

# SPA CARE

PURE INDULGENCE

# PURE INDULGENCE BEGINS HERE

## The perfect spa in three easy steps

There's a reason it's called a spaaaaah. Spas are all about taking it easy, laying back and relaxing. That's why we've made looking after your spa nice and simple. You'll need to use the Zodiac Chemicals complete spa care system to keep your spa beautiful.

## STEP 1 PURE BALANCE

Just like people, your spa needs balance. That means the water should be the same pH level as your skin. When the water is balanced the protective products you add later will work most effectively. That means no nasty micro-organisms and no corrosion to the equipment in your spa – and that saves you money.

## STEP 2 PURE PROTECTION

You're not the only one who enjoys a spa. Unfortunately, nasty micro-organisms also love the warm water. The range of Zodiac protective products can keep them away. Adding purifiers to a well-balanced spa creates effective protection against bacteria, algae and other harmful micro-organisms. Make sure your spa stays clean by regularly checking the levels of protective products in the water.

## STEP 3 PURE PERFECTION

With the unwanted guests taken care of, it's time to make your spa really sparkle. Zodiac Chemicals feature a range of products to do just that. Remember the best place to admire a spa is from in the water.

## PURE BALANCE

## PURE PROTECTION

## PURE PERFECTION

## SPA START UP

1. Fill the spa with clean water
2. Install Nature2 Spa Mineral Purifier Stick
3. Add the following spa chemicals as per the dosage chart on pages 6 & 7.

**NOTE:** when adding chemicals to the spa water always ensure that the pump is running and keep cover off for 30 minutes after adding chemicals. Always add chemicals to water, not water to chemicals.

1. Add Spa Alkalinity Up. Let the spa run for a few minutes. Check the pH level with your test strips and adjust if necessary.
2. Add Spa Power Purifier.
3. Add Spa Natural Clarifier.
4. Wait 15 minutes and test the spa water. Adjust the pH, total alkalinity and chlorine levels if necessary. For your safety the chlorine level should always be below 5ppm
5. Run the pump for a further 30 minutes with the cover off.
6. Set your spa to your preferred temperature. The most comfortable temperature is between 34-36 degrees C. It can be dangerous to be in a spa above 34-36 degrees C for extended periods of time.

**TIP:** Depending on your source of water you may need to add a small amount of Calcium Up to the water. Your spa professional can advise you and Calcium Up can be purchased separately.

# DOSAGE

NOTE: when adding chemicals to the spa water always ensure that the pump is running and keep cover off for 30 minutes after adding chemicals. Always add chemicals to water, not water to chemicals.

10 grams = 1 rounded teaspoon

30 grams = 1 tablespoon

Dosage rates indicated are only a guide

# MAINTENANCE

## DAILY

**NOTE: when adding chemicals to the spa water always ensure that the pump is running and keep cover off for 30 minutes after adding chemicals. Always add chemicals to water, not water to chemicals.**

### IF USING SPA

1. Dose spa with Spa Power Purifier 15 minutes before using the spa with the cover off and the pump running.
2. Next check the pH level. It should be between 7.2-7.6 adjust using Spa Alkalinity Up or Spa pH Down.
3. Using the Zodiac test strips, check the Spa Power Purifier level (chlorine level) is between 2-4ppm. If level is above 5ppm wait 1 hour and re-test. Swimming in chlorine above 5ppm is not recommended.

**HEAVY USE: Should more than 2 people be using the spa for longer than 1 hour, additional Spa Power Purifier may be needed. Add additional Purifier whilst there are no bathers in the water and wait 15 minutes. The addition of Spa Oxy Fresh at the end of bathing session is also recommended. For optimum spa quality, Spa Oxy Fresh can be added after every use no matter what the bather load.**

### SPA NOT IN USE

Add Spa Power Purifier as Daily Dosage chart on pages 6 & 7.

## WEEKLY

Weekly maintenance is recommended even if the spa is not in use.

1. Add Spa Oxy Fresh as per the Weekly dosage chart.
2. Test the spa water for pH & Alkalinity using Zodiac test strips and adjust if necessary using Spa Alkalinity Up or Spa pH Down.
3. Add Spa Natural Clarifier.
4. Remove N2 Spa Stick and keep safe. Remove filter cartridge and hose with a high pressure garden hose and replace N2 Spa Stick and cartridge to filter housing.

## MONTHLY

The spa filter keeps the water clean by capturing hair, oils and dirt washed off by people in the spa. If the filter becomes clogged then this matter cannot be captured and will return to the spa water. The following maintenance is recommended on a monthly basis.

1. Add 1 sachet of Cartridge Cleaner to a large bucket of warm water.
2. Remove N2 Spa Mineral Purifier Stick from housing and keep safe.
3. Remove filter cartridge and place in bucket of warm water adding cartridge cleaner and soak overnight.
4. Hose the cartridge thoroughly using a high pressure hose.
5. Return N2 Spa Mineral Purifier Stick and filter cartridge to filter housing.

**TIP: It is handy to have an extra filter cartridge so while you are soaking one cartridge you can put the spare cartridge in and continue to use the spa. If spa is under heavy use you may also find you need to soak your cartridge on a more regular basis.**

## EVERY 4 MONTHS

It is recommended that you empty and refill the spa every 4 months. The Nature 2 Spa Mineral Purifier Stick also needs to be replaced every 4 months. Before emptying the spa it is essential to remove organic contaminants from the pipes by following steps below.

1. Remove and dispose of Nature 2 Spa Mineral Purifier Stick.
2. Remove filter cartridge and soak overnight as per monthly maintenance.
3. Add Pipe Degreaser to spa water as per the dosage chart on pages 6 & 7.
4. Run jets for 15 minutes.
5. Empty Spa.
6. Re-install the spa filter cartridge.
7. Refer to Start Up Spa Procedure.

# TROUBLE SHOOTING

## How do I fix cloudy water?

Cloudy water is usually associated with unbalanced water.

1. Ensure that the cartridge filter is clean
2. Check pH/Alkalinity levels and adjust if necessary
3. Add a dose of Spa Power Purifier and Natural Clarifier to the spa and run the pump for 1 hour with the cover off.

## How do I fix smelly water?

Smelly water is usually associated with unbalanced water or a low purifier (chlorine) level

1. Ensure that the cartridge filter is clean
2. Check pH/Alkalinity levels and adjust if necessary
3. Add a dose of Spa Power Purifier and Natural Clarifier to the spa and run the spa pump for 1 hour with the cover off.

## How do I fix foamy water?

Foamy water is usually associated with detergents/body lotions in the spa. Never use household cleaners to clean your spa. Foaming can also be caused by heavy bather loads or incorrect pH/Alkalinity. Bathers should be encouraged to shower before entering the spa.

1. Check pH/Alkalinity and adjust if necessary
2. Add double weekly dose of Spa Oxy Fresh.
3. Add Spa Natural Clarifier as per the weekly dosage rate.
4. Run filter for an hour.
5. If foaming persists Spa Anti Foam can be added to the water.

## How do I reduce itchy skin and eyes?

Itchy skin and eyes is usually associated with unbalanced water or a low purifier (chlorine level)

1. Ensure that the cartridge filter is clean
2. Check pH/Alkalinity levels and adjust if necessary
3. Add a dose of Spa Power Purifier and Natural Clarifier to the water and run the spa pump for an hour with the cover off.
4. Adding a dose of Spa Water Softener to the spa every week gives the water a silky feel and is recommended especially for those with skin conditions.

**NOTE:** It may be easier to empty the spa referring to the EVERY 4 MONTHS section. Discuss with your Zodiac Pool & Spa Professional retailer.

## ZODIAC PURE SPA PRODUCT GUIDE

DESIRED OUTCOME	REQUIRED PRODUCT
To increase pH	Add Spa Alkalinity Up
To increase pH & Alkalinity	Add Spa Alkalinity Up
To decrease pH & Alkalinity	Add Spa pH Down
To increase spa chlorine	Add Spa Power Purifier
To decrease spa chlorine	Run Spa pumps with blower and air jets on and the cover off for 1 hour. Retest chlorine level. Repeat this this step until sanitiser/purifier is between 2-4ppm

To decrease hardness	Dilute water
To breakdown foam	Add Spa Anti Foam
To soften water and improve water clarity	Add Spa Water Softener
Scum lines	Use Spa Natural Clarifier as a maintenance product to avoid scum lines
Cloudy Spa	Use Spa Natural Clarifier
To degrease pipe work	Use Spa Bath Pipe Cleaner
To clean cartridge	Use Spa Cartridge Cleaner

## ZODIAC NATURE2 SPA STICKS

The Nature2 Spa mineral purifier uses a revolutionary process of patented mineral-bed technology to destroy bacteria in your spa.

Nature2 Spa automatically disperses silver and zinc ions into your spa, maintaining your water quality while reducing chlorine requirements.

### FEATURES

- Not affected by heat or swimmer load.
- Reduces stinging eyes and skin irritation.
- No moving parts or electricity required.
- Use with an approved oxidiser for a safe, clear spa.

To maintain optimal performance, the Nature2 Spa stick should be replaced every 4 months

At the end of a stressful day nothing feels quite as luxurious as slipping into the warmth of your own spa to relax the body and rejuvenate the spirit.

At Zodiac we believe that you deserve to enjoy your escape that's why we've designed the Pure Spa experience kit.
